

POWERED BY THE FIRST FUSION REACTOR.

Contact 7group at (717) 292-2636 or visit sevengroup.com to learn more about daylighting.

The sun is an infinite supply of power, above us every minute of every day, year after year. Why waste money on artificial lighting when daylight is free passive solar energy and truly sustainable?

7group can help you effectively implement daylighting strategies which will reduce electrical lighting dependency, reduce heat gains, and minimize HVAC loads. Gain the benefit of 7group's extensive daylighting expertise, ensuring your design not only meets, but exceeds, LEED requirements. **Let your building shine.**

7group's Daylighting Services: Performance Targets | LEED Simulations | Site Solar Analysis
Professional Development Training | Daylight Design Analysis | Software: Daysim, Radiance, AGI32, EcoTect

ARE YOU LEAVING SOMEONE IN THE DARK?

Contact 7group at (717) 292-2636 or visit sevengroup.com to learn more about daylighting.

7group

Unless you establish a daylighting goal, even the most elegant of designs can leave occupants without enough natural light. So, why settle for less than optimal daylighting performance to brighten the outlook of all occupants?

Allow 7group to show you how to establish daylighting performance metrics and incorporate daylighting into the DNA of your design. Gain the benefit of 7group's extensive daylighting expertise, ensuring your design not only meets, but exceeds, LEED requirements. ***Illuminate the possibilities.***

LET THE SUN LIGHT THE WAY.

Contact 7group at (717) 292-2636 or visit sevengroup.com to learn more about daylighting.

7group

Including daylight analysis as an early stage design tool should inform and influence the configuration of your building. So, why design in the dark, when you can make enlightened decisions?

7group can show you how your design will produce effective daylighting which reduces glare, saves energy, and improves the overall occupant experience. Gain the benefit of 7group's extensive daylighting expertise, ensuring your design not only meets, but exceeds, LEED requirements. ***Brighter outcomes.***

WE BELIEVE IN INTELLIGENT DESIGN.

Contact 7group at (717) 292-2636 or visit sevengroup.com to learn more about daylighting.

7group

Studies show that schools and offices which incorporate effective daylighting produce better students and busier workers. So, why not use the sun to increase your building's smarts?

Allow 7group to show you how effective daylighting designs can contribute to healthier and more productive occupants, and even improve test scores. Gain the benefit of 7group's extensive daylighting expertise, ensuring your design not only meets, but exceeds, LEED requirements. ***Turn on to design brilliance.***
